

The FCC should not allow Sinclair Broadcasting to air their so called "documentary". This is just another example of growing corporate ownership of the media-we have less "real" news and more of what the corporations want us to hear-this is not serving the public good but only results in lining the pockets of the corporate owners!

These are not the principles on which our country was founded!

I urge you to let Sinclair Broadcasting that the FCC will not permit them to use the air waves to promulgate their political opinions!

Thank you!
